1. Homepage

- **Purpose**: Acts as the entry point for the app.
- **Features**:
    - Quick navigation to Explore, Profile, and Upload Item pages.
    - Featured items or categories.
    - Personalized recommendations based on user preferences.
    - Notifications/updates like messages, restocked items, or new features.

---

2. Explore Page

- **Purpose**: The primary page for browsing items.
- **Features**:
    - Search bar with keyword-based search.
    - Filters for type, size, price, style, condition, and "Trending."
    - "Your Size" as an additional filter option based on user preferences.
    - Smooth scrolling and animations for a clean browsing experience.

---

3. Profile Page

- **Purpose**: Displays user details and activity.
- **Features**:
    - User's personal information (size, style preferences, etc.).
    - A section for the user's **last listings** and **last purchases** for quick access.
    - Edit profile and settings options.

---

4. Login Page

- **Purpose**: User registration and authentication.
- **Features**:
    - Login and sign-up options via email and phone number.
    - Password recovery functionality.
    - Simple onboarding for new users.

5. Item Page

- **Purpose**: Displays details of a single product.
- **Features**:
  - All item-relevant information, including photos, description, size, price, tags, and condition.
  - Two buttons:
    1. **Contact Seller**: Directly initiates communication with the seller.
    2. **Buy Now**: Allows immediate purchase with an additional fee for delivery.
  - Additional details such as the seller's rating or profile link for trust building.

---

6. Upload Item Page

- **Purpose**: Enables sellers to list items.
- **Features**:
  - Upload photos and add a description, size, price, and tags.
  - AI-powered **QuickUpload** feature for auto-tagging and metadata generation.
  - Preview of the listing before publishing.

---

7. Admin Panel

- **Purpose**: For admin-level monitoring and management.
- **Features**:
  - Dashboards for user activity, sales, and feedback analytics.
  - Tools for managing content, such as approving/rejecting listings and moderating flagged items.
  - User management tools, including roles and bans.
  - Access restricted to admin users via role-based controls.
